Chine House
Veterinary Hospital Limited

Chine House Veterinary Hospital – Environmental Policy

Our commitment

We are striving to reduce our impact on the environment. We acknowledge that our Practice has an effect on the environment in terms of the materials we use, emissions to air and water and waste generation.

We recognise that the health of animals, humans and the environment are inextricably linked. Environmental degradation affects the health and wellbeing of our employees, animal health and welfare and public health. Our work is therefore strengthened by protecting the safety, health and environment of our employees and the people and animals of the community in which we work.

Implementation:

We are committed to working with our staff, suppliers, colleagues and neighbours to achieve the following objectives:

- Reducing our waste, reusing and recycling materials where possible
- Implementing water and energy conservation techniques
- Reducing transport use where possible

We will continue to improve our environmental management system through regular reviews, taking into account any changes within legislation, our organisation and other factors. We have appointed a Sustainability Champion within our business to support our commitment.
